Our Vendor Base

For an organization like ours, which is entirely into the supplying of products, it becomes extremely important to identify a suitable vendor base. Thus, we have hired a team of procuring agents, having vast experience and in-depth knowledge of latest market trends and developments. Our experts are well-aware of the leading manufacturers in the market, from which they select the most appropriate ones, so as to effectively cater to the requirements and demands of our clients.

OUR SERVICES

The company is in the market to provide the customers with the following services that are necessary to make a self-defence against Fire Hazards in domestic households, commercial areas as well as industries.

We undertake the responsibilities to :

- 1) Study the Hazard level of different types of occupancies and identify the most critical part of the same, suggest the necessary measures required to be taken against Fire Hazards complying, national / international standards. We also do the above to comply the statutory requirement and obtain statutory approvals for the occupancy on behalf of our customers.
- 2) Supply all the necessary materials, equipment's and accessories, do the erection at site with testing and commissioning the same and conduct performance trial after systems are commissioned.

Client Satisfaction

Being a supplier, it is important for us to win the trust and faith of our esteemed clients in order to accelerate the demand of our products in the market. For this purpose, we have adopted an effective approach, which is centered towards achieving utmost client satisfaction. As per this approach, we offer a diversified range of Fire Fighting Products that caters to the requirements of various industries.. Further, we lay special focus onto the specifications provided by our clients, and procure the products accordingly from our credible vendor base. We also ensure that our product range is flawless by checking it on the basis of different quality parameters.

In addition to wide variety and premium quality, we also facilitate our clients with other additional benefits, such as prompt delivery, wide distribution network, and competitive pricing. Considering the fact that our products are prone to damage, we provide our clients with technical support and suggestions that can help them in proper installation and usage of these products. Such measures have helped us in establishing cordial and long lasting relationships with our reputed clients spread throughout India.

Quality Policy

“We follow a quality policy throughout for our products, to ensure their high quality standards.”

Our quality policy states that :

- We provide complete range of fire fighting equipment under one roof
- We offer products that meet or exceed the stated and implied needs of our clients
- Our range must be checked on different parameters to ensure its flawlessness
- We ensure that continuous improvements in the quality standards of products must be done

Quality Assurance

We are aware of the fact that premium quality is a necessity to ensure increased demand of the products in the market. In order to fulfill this requirement, we procure our product range from various authenticated vendors. These vendors, comprising some of the leading manufacturers, are well-known in the market for the durability and reliability of their products. To ensure the quality of products at our end, we subject the procured range to stringent tests that adhere to the international standards

Further, we also ensure that the products are packaged well, and are stored in favorable conditions, so as to prevent any sort of damage to the equipment. To ensure that our products do not harm the users, we also provide them with various value-added services for the installation and commissioning of these fire fighting products. Owing to such superior quality of our products, we are accredited by an ISI certification, and have attained a respectable and reputed position in the domestic market.

Why Us?

Accredited by an ISI certification, we have gained immense recognition across the country for supplying a wide range of Fire Fighting Products. The entire range is of optimum quality, and is oriented towards high performance and functionality.

The factors that have helped us in gaining an edge over our competitors in the market are:

- Credible vendor base
- Wide variety
- Industrious team
- Customized range
- Timely delivery
- Economical cost
